

## ECOMPEX EXECUTIVE BIOGRAPHY

---

### Hubin Jiang

President & Chief Executive Officer

B.Sc., M.Sc., and Ph.D. Candidate in Electrical Engineering

Hubin Jiang founded ECOMPEX, Inc., an information and knowledge management company, in 1995. Mr. Jiang is a pioneer developer in document imaging and management systems, and applied artificial intelligence systems.

With a firm foundation in the areas of artificial intelligence, knowledge management, and content analysis, Mr. Jiang departed from his Ph.D. candidacy in Electrical Engineering in the early 1990s to focus on applied technology development. Prior to launching ECOMPEX, he was the co-inventor of a satellite remote sensing imagery system, the Maryland Image Visualization and Analysis System (MIVAS). Mr. Jiang was instrumental in the research and development of CorpCast, an expert system with innovative self-learning capabilities. Mr. Jiang is credited with the development of a neural network model for simulation of human visual perception and a machine learning model for natural handwriting recognition. He is a trail blazer in innovative technology development with expertise in the fields of document understanding, expert systems, content management, and document imaging. Mr. Jiang holds more than five patents and patents pending in the above-mentioned technology fields.

As President and Chief Executive Officer, Mr. Jiang has taken ECOMPEX from a start-up company with one employee to a major industry leader in information and knowledge management. An expert in software life cycle development and programming, Mr. Jiang developed ECOMPEX's first imaging and scanning system, VersaScan<sup>®</sup>, which sold to numerous Fortune 500 companies and Federal Government agencies. Mr. Jiang is a dedicated entrepreneur who has focused on growing ECOMPEX by leading the marketing and sales forces, developing state-of-the-art technologies, and providing value-added services to ensure total customer satisfaction. Under his leadership, ECOMPEX continually implements enhancements that refine its quality systems to promote growth and profitability on behalf of its customers, which in turn supports the business goals of the company and the well-being of its employees.

For more than 20 years in business, Mr. Jiang has built a proven track record of marked achievements and success in the area of information technology development and implementation. His focus on quality products and exceptional service has been the catalyst for the tremendous growth of ECOMPEX. Mr. Jiang's commitment to excellence has made ECOMPEX widely recognized by its Federal Government agency customers for its innovative technologies and quality services.
