

PRODUCT OVERVIEW

eDocMax - Document Management & Retrieval Solution

Browser-based document management & retrieval with secured redaction, annotation, and easy search and retrieval

eDocMax is a browser-based application created with pure Java technology exclusively by ECOMPEX, Inc. to address your electronic management and retrieval needs in today's paperless work environment. As a state-of-the-art and cost-effective electronic system, eDocMax enables document retrieval and management in a secure environment. With the combination of features that comprise the eDocMax system, the next generation of electronic storage is at your disposal.

The eDocMax system consists of an executive console, administrator console, user console, and scan console. For the utmost protection, the eDocMax system allows your system administrator to assign security access for viewing rights to ensure the confidentiality of your documents and images. This innovative system makes document management less time consuming and more cost effective with its easy retrieval system that allows you to locate quickly and easily the information you need.

eDocMax is feature rich with full text searching, multi user secure redaction, and annotation capabilities to name a few. These advanced features do not interfere with its easy-to-understand and user-friendly interface.

Security and Accountability Management

- Secured access with authentication management
